Projects

May, 2021 – **Web design and development company website:** This is a web development Company based website .There user can get software, Domain-Hosting, Mobile apps cloud services and many other solution. User can see the company's recent works .If user login or signup our website the will conduct with a user dashboard .There are some extra option in nav bar like order status, setting, project purchase. Registered member can buy our project and can see their order status. And also can logout from the user dashboard .The backend is maintain by MySQL database and php.

Website 

Technology: Html, CSS, Java Script, PHP, MySQL

January, 2021 – **Mulsilm Prayer auto time zone synchronization App :** The android app has many futures.The app has a good looking interface. The app show the five-time salat times and there is division wise time. In our country eight-division, salat time can be shown in this app. When any salat waqt is running the app is indicated this waqt .In our app, there is a manual mode. When the watch user login in the manual mode he can manually update the watch time and send short notification messages into the watch.

Technology: Java, Android Studio, XAML, JSON, API

August, 2021 – **Java Desktop Application for Finding Available Hospital Bed:** Today's people are so upgraded. People want to do any work within short time and think to get the best way of solution. Suppose you have a good family and a family member has injured or very sick. So he/she must be admitted to hospital but you don't know which hospital has ICU bed available. In this time, maybe you can call some hospital to know your requirement. This process is so time costly, maybe the injured person will be dead. That's why we build a system "Hospital bed finding System" where people can find available ICU bed hospital. People can see which hospital has available bed, Hospital Location, Search box, Hospital profile, Update or delete hospital information (Admin or hospital admin)
Technology: JAVA, Netbeans, swing, AWT, MySQL

Education

January, 2017 – **Bachelor of Science in Computer Science and Engineering** City University
present Dhaka-1216 Thesis/Project running current CGPA: 3.78

June, 2014 – **Higher Secondary** Govt. Hazi Mohammad Mohsin College GPA: 3.92
May, 2016

January, 2009 – **Secondary** Rotary School Khulna GPA: 4.67
April, 2014

Extracurricular Activities

2018 18th INTRA CITY UNIVERSITY PROGRAMMING CONTEST
2019 19th INTRA CITY UNIVERSITY PROGRAMMING CONTEST place- 4th
2019 ICPC Dhaka Regional Preliminary Contest place 633- CityU_Anonymous [City University]
2020 20th INTRA CITY UNIVERSITY PROGRAMMING CONTEST place- 2nd
2017-2021 Problem Solving Online Judge - Uri judge profile [↗](#)
- Codeforces judge profile [↗](#)
- UVA judge profile [↗](#)

Interests

- Web Development
- Software Development
- App Development
